

GP-21

1.2GHz Omnidirectional Antenna

Specifications:

- 1240-1300MHz
- Gain: 14.9dBi
- Length: 95 inches
- Weight: 2lb 8oz (inc brackets)
- Max Power: 100 watts
- Max wind survival: 112MPH
- Wind load: 47 sq in/.32 sq ft
- VSWR: 1.5:1 or less
- Mast req'd 1.25—2.50 inches
- Connector: Integral N-female
- Radome: One piece UV stabilized fiberglass
- Mounting hardware included

Vertical radiation pattern

FEATURES:

- High gain omnidirectional pattern for long-range communications
- Heavy duty, one-piece fiberglass radome, 112 MPH wind survival
- Mounting pipe acts as a shroud, protecting the coax to antenna connection from moisture/wind etc.
- Extruded aluminum brackets and stainless steel hardware included
